## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-11 and 13-17 are rejected under 35 U.S.C. 102(e) as being anticipated by EP 1 382 254 A1. The EP 1 382 254 A1 reference discloses the claimed invention and further inherently discloses a bottom of each stopping pin guide groove being higher than a bottom of each pivot pin guide groove (i.e. as shown in Figures 4A and 4B of the drawings). Thus, the features of the instantly rejected claims are structurally met by the reference.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 382 254 A1. The reference EP 1 382 254 A1 discloses the claimed invention except for the pins being made of heat-resistant rubber or elastic material. It would

have been obvious to one having ordinary skill in the art at the time the invention was made to have made the pins of heat-resistant rubber or elastic material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
